Art Unit: 2624

1. The following is an examiner's statement of reasons for allowance: None of the prior art discloses the claimed invention. Specifically, independent claim 1 requires inventive features of "wherein said plurality of reference context bits for said bit to be compressed are identified from said context model template according to numbers of bit planes of said bit array and shape of said context model; said bit to be compressed and said plurality of reference context bits are on a same bit plane". Independent claim 9 requires inventive features of "determining a number of column spacing of context model according to said number of bits of each pixel; determining a shape of context model correspondent to said context model template; covering a range of reference context bits in said bit array for a bit to be compressed; in the range, obtaining a plurality of reference context bits in a same bit plane of said bit to be compressed by using said context model". The inclusion of such features, in combination with other features, in the claims renders the claims allowable. The prior art references found are Rabbani et al (5,442,458) and Schwartz (6,285,790). These references fail to disclose the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuoc Tran whose telephone number is (571) 272-7399. The examiner can normally be reached on MON-FRI.
